

S.N. 10/065,093

124335

**REMARKS**

Claims 20, 21, 23, and 24 are pending.

Amended claim 20 recites that the first electrically conducting layer or the second electrically conducting layer of the light-emitting element covers a side portion of the raised feature. Support for this amendment is found in Figures 8 and 9 of the original specification as filed.

In view of the above, it is submitted that the claims are patentable and in condition for allowance. Reconsideration of the rejection is requested. Allowance of claims at an early date is solicited.

Respectfully submitted,
